# Instant Messaging/Chat

## Supported Devices

Supported models include the following devices:

- Microsoft Windows Mobile 2003 SE Pocket PC
- Microsoft Windows Mobile 5 PocketPC/Smartphone
- Microsoft Windows Mobile 6 and 6.1 Standard/Professional
- Nokia E-Series devices (OS 3,x only).
- Smartphones running Android OS 2.0.1 and greater.
- Apple iPhone or iPod Touch with iOS 4.3 or later.
- Apple iPad.
- Blackberry devices that are running OS 4.2 - OS 6.

## Android

### Installation

1. First install the application on your device. Open the browser application and go to the following url.  
  
<http://ucweb.wnyric.org/stmobile/Sametime.html>
2. Click **Android** under Download Lotus Sametime for your supported mobile device. This will start the download of the Sametime application.
3. Once the download is complete, select the **Android notification tray** to install Sametime.
4. Once the install is complete, start **Sametime**.
5. You will be prompted to enter:
  - The address of your proxy server in the server field. <http://ucweb.wnyric.org>
  - Your userid and password.
6. Select **Next**.

### Starting/Login

After installing Sametime, you can start the application.

On an Android device, go to the Application launcher. To find Sametime on your device, look for the Sametime icon: 

After starting Sametime, log in.

## Windows/Nokia

### Installation

First install the application on your device. Open the browser application and go to the following url.

<http://uc.wnyric.org/mobile>

On the download page, click the arrow and select your device then click **Download**.

When the download is complete, the software is installed and ready to use.

### Starting/Login

On most devices, open the **Downloads** folder and choose the **Sametime** application. To find Sametime on your device, look for the Sametime icon: 

After starting Sametime, log in.

## iOS

Please see individual documentation for Apple iOS devices.

## Blackberry

Please see individual documentation for Blackberry devices.
