This two-part training package, which will be given as an asynchronous online training designed for building level administrators and teachers, is intended to help participants understand that exclusionary practices have significant short and long-term negative effects on academic, social-emotional, health and wellness, and family outcomes of students and that there are alternative approaches to discipline that lead to improved student outcomes.

Participants will ground themselves in a common understanding of suspension, removal, and discipline, as well as influences, impacts, policies, and procedures that contribute to the on-

### Description:

#### Module 1: Six Models of Co-Teaching

The purpose of this training is to help participants gain a foundational understanding of co-teaching as a service delivery model and the six models used to implement it. In New York state the co-teaching model is most often associated with the special education service integrated co-teaching. This model will be covered as well as the use of the co-teaching model among other service providers (e.g. English as a New Language [ENL] teachers, speech language pathologists etc.). Variations for use of the models will also be discussed throughout the training.

#### Module 2: Building Your Co-Teaching Team

In this workshop we will focus on the three key components of an effective co-teaching partnership which are co-respect, co-responsibility and co-planning. Building and maintaining a strong partnership is essential for optimizing the benefits of co-teaching for student learning. The blended expertise of the team provides teachers with a unique opportunity to reach many more students academically, emotionally and behaviorally. It is critical to understand the

importance of both building a strong partnership as well as maintaining the strong partnership through ongoing reflective practices.

### **Module 3: Planning for Instruction**

In educational research, co-teaching is referred to as the instructional methodology or structure that two teachers use. Co-planning is critical to the success of this teaching structure. The purpose of this training is to provide foundational knowledge for the effectiveness of purposeful co-planning. In addition, participants will gain knowledge about options for co-planning and apply the information to co-plan a lesson for current or future use. Co-teaching can be applied in any situation when two teachers provide instruction together. It is highly recommended that co-teaching teams attend together, although the information provided will benefit individual teacher practice as well.

**Objectives:** Participants will be able to:

- Understand co-teaching as a service delivery model
- Learn the 6 models of co-teaching and how to effectively implement them
- Gain skills for matching the co-teaching and how to effectively implement them.
- Identify a co-teaching model in a given scenario.
