**Program Summary**

- Occupational Education (OE) offers supportive career development programs for students with learning or management needs who require small classes and individually modified curricula.

**OE I (One School Year)**

- Students will explore career modules in automotive services, building maintenance, food service, and human service. Student performance is evaluated at the end of each five-week period. Evaluations from OE I are used as a guide to help choose an appropriate training area for OE II.

**OE II (Two or More Years)**

- Students will choose one of four strands in which to continue skill development. These include Automotive Services, Building Maintenance, Food Service, and Human Service. Curriculum activities relate to entry level employment skills necessary for successful performance. Internships are available for those students ready to work in the community.

**Special Notes**

- Occupational Education students have usually undergone a vocational assessment and are able to function safely in a shop setting.

**Program Eligibility**

- CDOS Credential or Pathway (with Completion of OE II)

---

### Career Paths

#### Automotive Services
- Auto Detailer
- Parts Counter Worker
